Re: NSCP YouTube Compounding Videos

Since the introduction of the [Standards of Practice: Non-Sterile Compounding](#) in March, the NSCP has received questions from practitioners about how to apply the standards to their compounding practice.

To address frequently asked questions with real life examples, the NSCP has created five non-sterile compounding videos on YouTube. These video modules are a helpful resource to aid you as you continue to incorporate the standards into routine practice.

To access all five video modules, please visit the [NSCP YouTube Channel](#).

The modules have been accredited for a total of 1.5 CEUs by Dalhousie College of Pharmacy Continuing Pharmacy Education. A certificate of completion can be accessed by completing a 5-minute, anonymous survey using the link provided in the video description.

Note: All pharmacies are expected to be prepared to provide basic compounding services, and all pharmacists and pharmacy technicians are expected to maintain their competence to do so (see the [Position Statement: Professional Responsibilities to Meet Patient Needs Related to Compounding, Opioid Agonist Therapy, and Prescribing](#)).
